

Powerhire Take Delivery of New Loadbank

The demand for Loadbank Rental at PowerHire has been on the rise for the last few years and the requirement to add further units to the fleet was inevitable.

Having worked with Froment for over 20 years it was once again an easy decision to secure PowerHire's additional custom built loadbank from them.

Froment have been designing and building World class testing systems for the global power supply industry for more than six decades and we know we can always be assured of the quality of their product.

After several months of consultation with Froment, Allan Skorka, Director at PowerHire, was delighted to take delivery of their fourth 10ft containerised inductive/resistive loadbank to complement their existing fleet of loadbanks ranging from 20KW resistive to 2.5MVA resistive/inductive.

Allan commented "This new unit is already proving to be an essential addition to our extensive rental fleet of loadbanks, enabling us to continue to satisfy and grow our customers worldwide."
