WELCOME TO POWERHIRE

GLOBAL POWER RENTAL

Powerhire operates globally from our bases in the UK, providing power rental solutions wherever there is a requirement for temporary power and related equipment throughout the world.

CUSTOMER SERVICE

Powerhire works closely with each individual customer on a project by project basis to establish the best possible solution using our extensive range of rental equipment to achieve their requirements. No matter if it's the provision of a single generator operating in a standby application, or the provision of a fully manned multiple generator installation exporting power to a utility infrastructure, Powerhire recognises the importance of providing each and every customer with the same high levels of service and attention to detail expected of us in today's demanding world.

EXTENSIVE RESOURCES

Powerhire's extensive resources enable us to react immediately to our customer's requirements using our comprehensive fleet of power generation equipment and ancillary products, in addition to generators Powerhire also provides a wide range of bunded fuel tanks, transformers, open and containerised switchgear, loadbanks and LV and MV cable products on a short or long term hire basis. Powerhire's resources take our customers well beyond the traditional range of services offered by other companies within our industry and extends from the simple hire of generator in a standby application to a fully operated turnkey project providing base load power, offered throughout the UK, Europe, and Worldwide.

OUTSTANDING PEOPLE

Powerhire's temporary power generation equipment is installed and commissioned by our own world class team of highly skilled service and commissioning technicians, working alongside powerhire's highly experienced engineers and project managers.

24 HOUR SUPPORT EACH & EVERY DAY

Powerhire offer a genuine 24 hour support service to all of our customers each and every day for clients requiring equipment out of hours, the provision of a service technician, or for technical support. This service is provided via our Tilmanstone head office main telephone number.

Your Power, Your Future, Our Solution.

CONSTRUCTION POWER

Powerhire, fully understands the demands and challenges of providing temporary power generation equipment to the Construction industry where reliability, flexibility and robustness are essential. Whether for a new construction project or in support of ongoing works, Powerhire can deliver equipment to meet these requirements on a global 24/7 basis.

Powerhire provide a range of services and equipment to the Construction industry that includes generators and switchgear for Prime power, and Standby applications to support full site loads, temporary site offices, tower cranes, electrically power plant, and other equipment used in the construction industry.

In addition to the wide range of power generation equipment and ancillary products, Powerhire also provides bunded fuel tanks, open and containerised switchgear, and cable products on a short or long term hire basis that can all be hired individually regardless of whether a generator is required.

Powerhire's resources take our customers well beyond the traditional range of services offered by other companies supporting the construction industry.

Your Power, Your Future, Our Solution

LET THERE BE POWER

Powerhire offer a range of generators for the construction industry from 15kVA to 1,500 kVA in a single unit

Powerhire offer road towable generators up to 200 kVA

Powerhire has a modern fleet of ADR compliant delivery vehicles

WE'VE GOT

THE POWER

POWERHIRE DELIVER AND INSTALL 4 X 1,250 KVA GENERATORS ON TO A ROOFTOP FOR A LEADING FINANCIAL INSTITUTE IN THE CITY OF LONDON

EVENT POWER

From County Shows to the outdoor concerts and festivals, Historic Buildings to Temporary City Centre Ice Rinks, and for Media, Television, and permanent venues, Powerhire has the proven experience and expertise to provide a complete temporary power solution.

Powerhire maintains a whole host of specialised event equipment and services that includes specialist super silent event generators, an extensive stock of power cabling ranging from 16 Amp single phase to 125 Amp 3 phase, a range of Distribution Switchgear, Lighting Equipment and much more.

No matter how large or small the event, and regardless of whether a combination of our services or just one Generator are required, Powerhire work with the customer to provide complete turn key solutions to ensure that the temporary power requirements of the event are met.

Your Power, Your Future, Our Solution.

POWER TO THE PEOPLE

Powerhire offers an extensive range of hard wired distribution switchgear from 400 Amps to 6,000 Amps

Powerhire offer numerous configurations of specialist event switchgear

Powerhire offer bunded fuel tanks from 950 ltrs to 20000 ltrs in a single tank

Powerhire offer a range of specialist event generators in single and paralleling configurations

PREPARED FO

OR ANYTHING

POWERHIRE DELIVERS AND INSTALLS 3 X 1,000 KVA GENERATORS AT SHORT NOTICE FOR A POWER OUTAGE FOR A LEADING INTERNATIONALLY RENOWNED HOSPITAL

STANDBY POWER

Powerhire have an unrivalled experience in providing temporary generators and associated equipment for Standby applications and we have proven experience in providing temporary LV and MV generator installations for Banks, Data Centres, Supermarkets, Offices, Factories, Hospitals and a host of other applications for both short and long term rental projects ranging from 1 week to several years.

Our team of highly skilled and experienced generator engineers can provide rental equipment for planned shutdowns and also on an emergency basis via our 24 hour call out service.

The range of equipment that we offer includes generators from 10 kVA to 2,000 kVA which can be configured and installed as a single generator or as multiple sets operating in parallel. The equipment that we offer extends beyond generators to include temporary distribution and change-over switchboards up to 6,000 Amps, Fuel Tanks up 20,000 litres, and individual load cables rated up to 600 Amps. All of which is transported to site using our own fleet of lorries 24 hours each day, 7 days a week.

With unbeatable knowledge, expertise and service, Powerhire offers our customers a world-class service, wherever, whenever and whatever the application or operating conditions.

Your Power, Your Future, Our Solution.

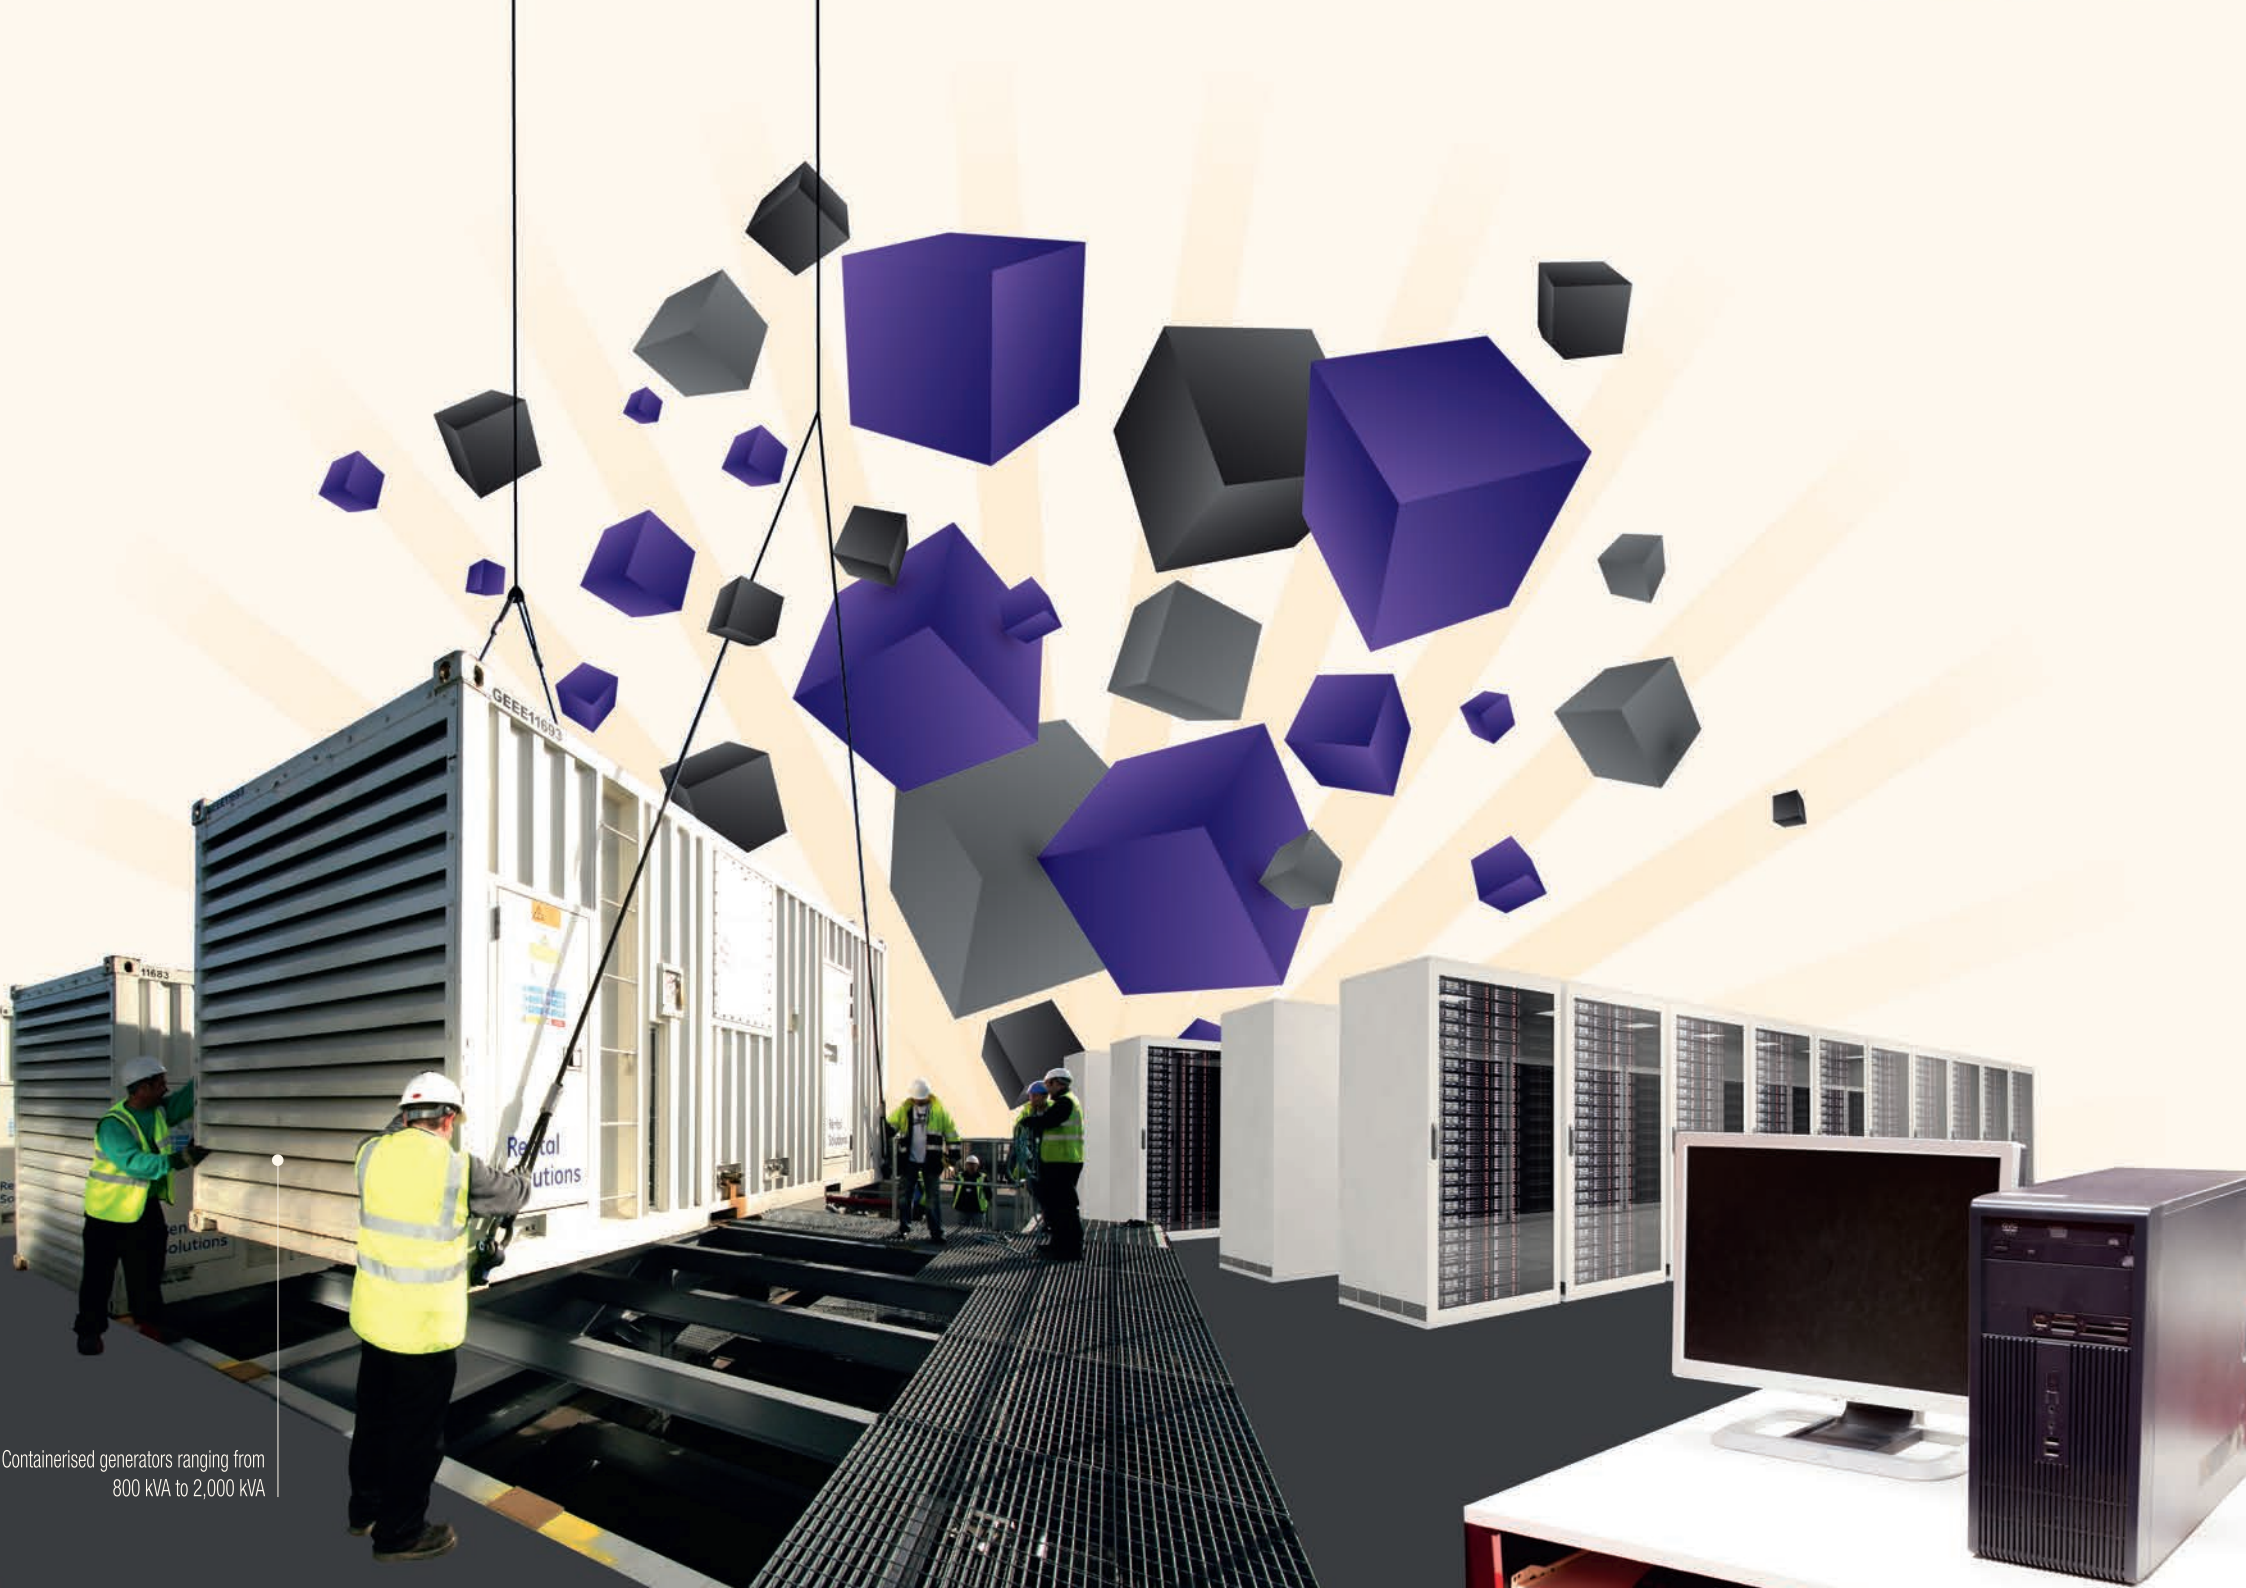
Over 50kms of 120mm² and 240mm² cable available for hire



Containerised generators ranging from
800 kVA to 2,000 kVA

LOADBANK HIRE

Powerhire operate a fleet of modern loadbanks that can be used as individual units or multiples of 20 kW resistive to 2.5 MVA Resistive/Inductive. Each loadbank has the facility of being controlled from a hand held device or via a PC utilising software that an operator can pre-program a complete test schedule incorporating load changes and durations and automatically record the electrical operating parameters and transients of the test.

With a wealth of knowledge, modern and extensive range of resistive and reactive loadbanks, load cable, and transformers, and extensive worldwide experience, Powerhire is one of the leading suppliers of temporary loadbanks for low voltage and high voltage application and no project is too large or too small.

Powerhire's loadbank division employs a team of dedicated specialists ready to undertake any project involving a loadbank whether it is delivery only of a single loadbank to test a 400 Volt Supply, or a full turnkey project to deliver, install, commission, and operate multiple loadbanks testing a medium voltage power supply.

Your Power, Your Future, Our Solution.
