

Powerhire Production Power for the Future of Flying

Since 1999 this innovative Hampshire based Production Company have been helping brands come to life, igniting sparks of inspiration and turning heads.

While they never take their eyes off the bigger picture, they know that beauty is in the detail.

They have built a solid reputation for delivering world-class live events, fashion shows, retail installations and film production services.

Client

Production Company

Project in Brief

Temporary power for the production of a live documentary & discussion programme.

Unit B1 Colliery Business Park
Pike Road, Eythorne,
Dover, Kent, CT15 4FE

Which is why, when they contacted Powerhire to provide a complete power solution for their latest production in the tourist mecca of London, we knew we would ideally suited in providing the most effective temporary power package for their needs.

The Production Director contacted our Rental Sales Manager with the specific details of the planned layout of the technical equipment being used for the live production and agreed a suitable date to meet him on site,

Cable Hire

Generator Hire

Fuel Tank Hire

Load Bank Hire

Distribution Hire

at the Stunning Royal Academy of Engineering, to assess the exact location of the rental equipment as well as the production kit, and to advise on the specific power distribution required.

As minimum noise levels was of critical importance one of Powerhire's 300kVA super silent generators together with the necessary cabling and fuel tank was specified as the most suitable for the weeks hire.

Powerhire's Installation Team of Engineers delivered and installed the rental plant to power the high technology led production solution which included a massive 9m x 2.8m LED screen, ceiling projection and a custom designed stage block with integral CYC and LED lighting. Prior to leaving site the power package was tested and commissioned to ensure the set up adhered to the relevant electrical standards, running at optimum load.

On completion of the weeks successful hire period with the smooth, uninterrupted running of both production equipment and rental power distribution Powerhire's Engineers arrived on site to collect our kit with the Production Director commenting **"Powerhire provided us with a 300kVA set, I was super happy with the kit, nice and new and didn't miss a beat. Plus delivered and collected on time out of hours which is awesome"**.
